

Chicago Foreclosures Edge Higher In September.

Foreclosure levels show signs of continuing to increase in Cook County.

Chicago, IL, October 7, 2008: The number of default filings in Cook County was up slightly in September. RentalForeclosure.com, a web site that provides information to renters about landlord foreclosures, tracked 4,260 defaults in September. That number was up from 4,249 defaults filed in August and just lower than the 4,296 filed in July.

“It seems more like a leveling off than an increase” said Shawn Shepherd, co-founder of RentalForeclosure.com. “Unfortunately, we feel like there will be a real increase in filings in October as mortgage companies and loan servicers try to determine what the best way to get assistance from the new government rescue package will be,” Shepherd added.

The number of filings in July represented highest monthly total in 2008. July's totals showed a 55% increase over the number of filings in May, the largest two month increase in recent years.

Company Information:

RentalForeclosure.com was founded in 2007 by Dave Madam and Shawn Shepherd in an effort to provide renters with timely information about the status of their rental. www.RentalForeclosure.com gives renters the opportunity to find out quickly and easily if their landlord is facing foreclosure.

RentalForeclosure media contact: Dave Madam, 702.497.4251
